## DALLAS WASTE MILLS.

### Contract for Construction of Factory Building Is Awarded.

Architects **Hubbell** & **Greene** report that the contract has been let for the construction of a factory building for the Dallas Waste Mills. The work on this building will be begun Monday. It is to be a one-story brick structure, and will be erected at the intersection of the Houston and Texas Central and Terminal Railways. The one story will be constructed in such a manner that additional stories may be conveniently built upon it in case it may be desired later to increase the capacity. The material is now coming in and it is expected that the building will be completed in about ten weeks.

The contract has also been let for the High School at Arlington, which is to be a modern brick structure of two stories and eight rooms. It will be equipped with all modern conveniences. The work was begun yesterday and is expected to be finished about Dec. 1.
